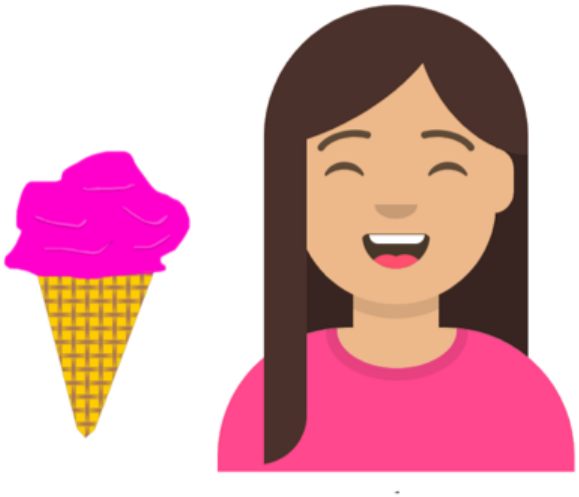
**Training block**

We're going to play a game where I tell you some stories and then ask you a question about it. Here's the first story!

This girl's name is Lisa

One day, Lisa got an ice cream cone, and so she was very happy. But then...

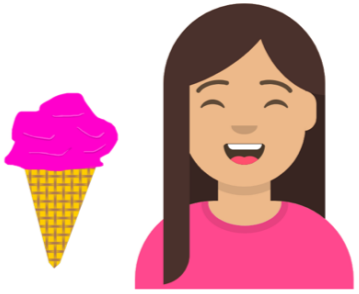


...she slipped and dropped her ice cream cone on the ground.

This made her very sad.

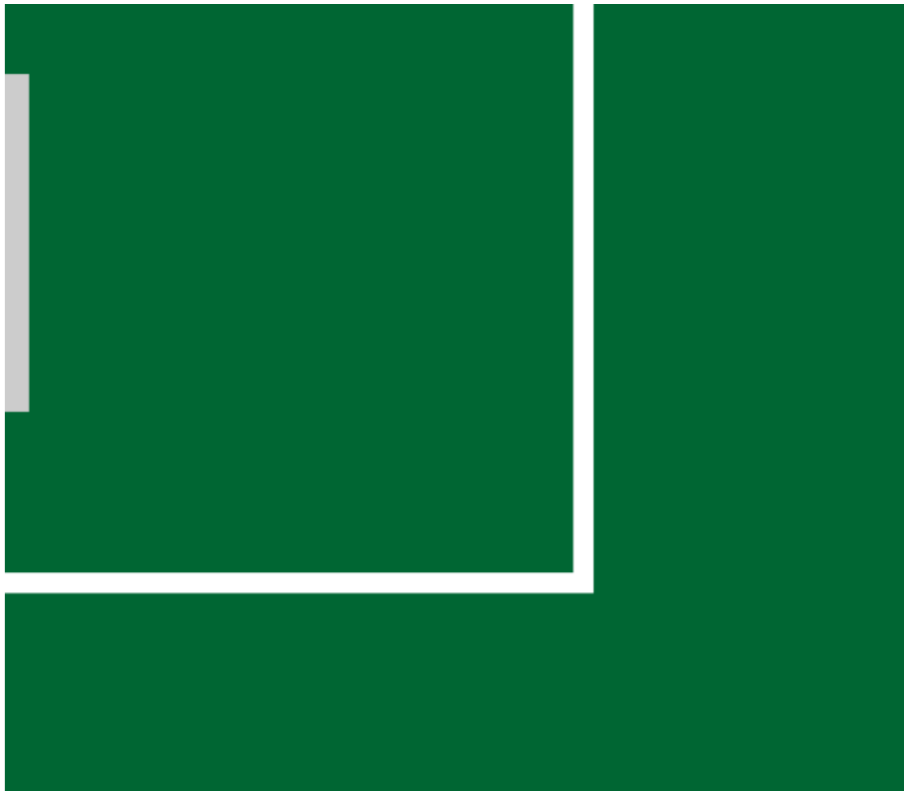
So here's a picture of what actually happened.

Now I want to ask you a question: What if Lisa had not dropped her ice cream cone? Which picture would she look like?



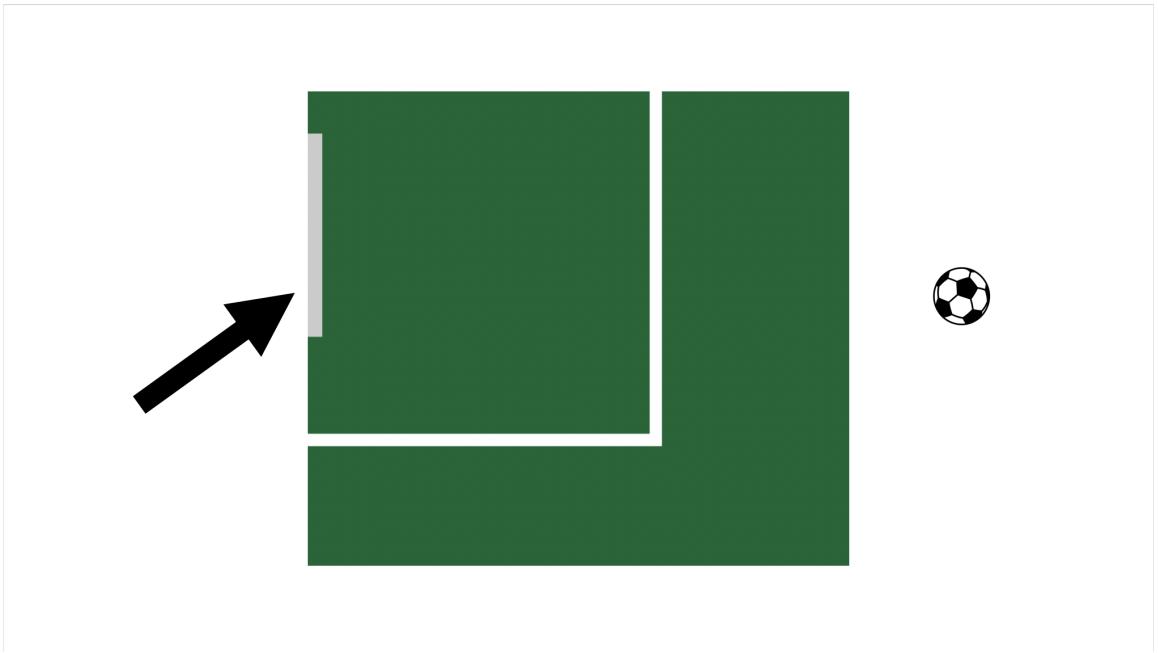
## Task block

This is a picture of a field where people can play sports.

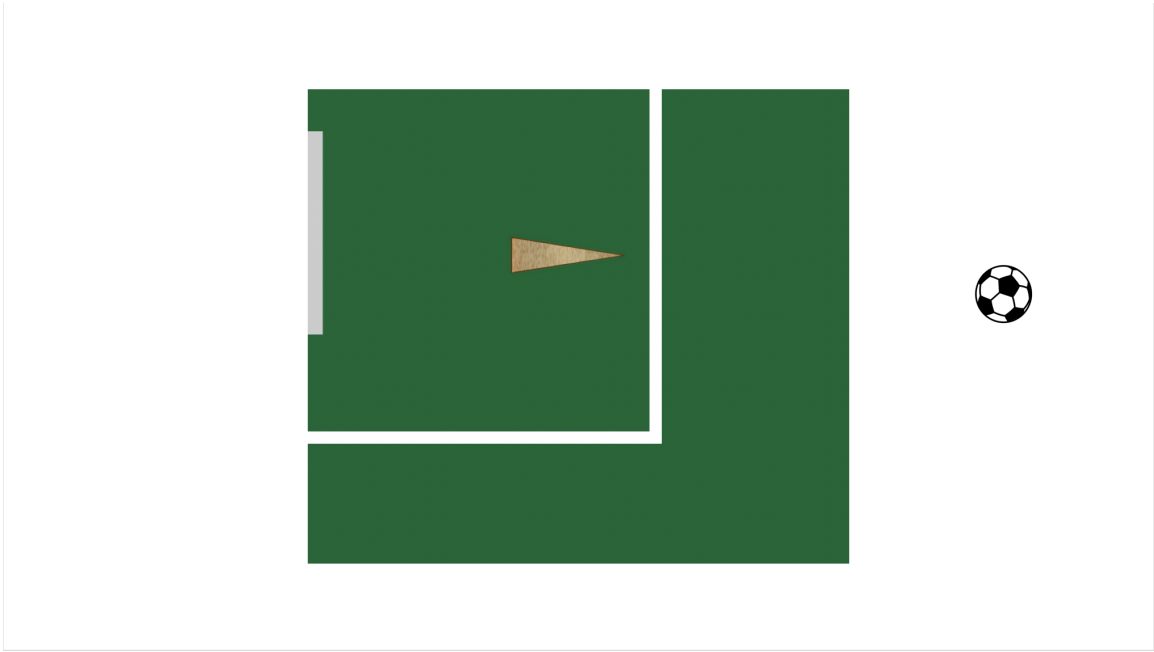


For example here is a soccer ball. One of the sports people could play on this field is soccer!

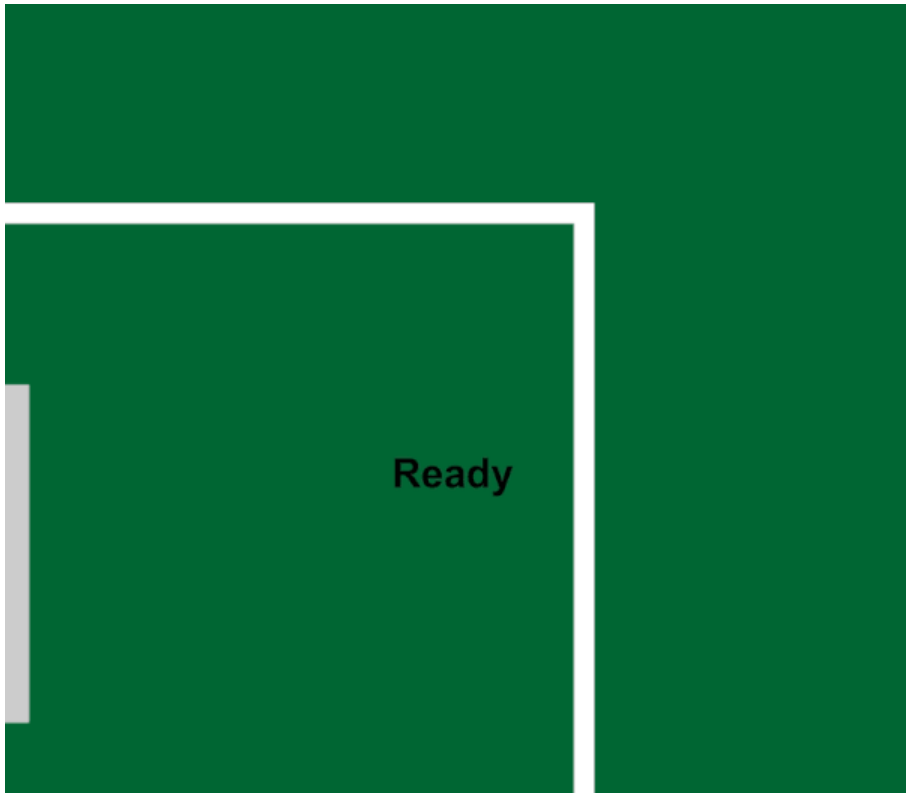
Now there is an arrow pointing to a box. The box is the goal! So when the ball goes into the goal, one of the teams scores a point!



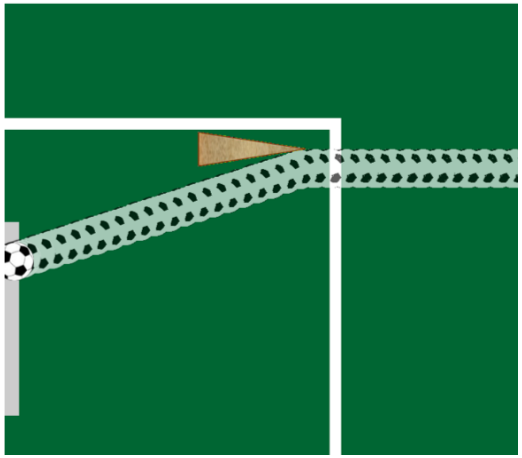
There is one more really important thing about the field. Sometimes, there is a big wooden block on the field.Here is the big wooden block. If the ball hits the block, the ball can bounce and go in a new direction!



Now I’m going to show you a short video of the ball moving, and then I'm going to ask you a question about it.



So here's a picture of what actually happened.



Now, if there were no block on the field, how would the ball have moved? Point to the picture that shows how the ball would have moved if there were no block on the field!
